INTERNATIONAL ELECTROTECHNICAL COMMISSION

**GUIDELINES FOR ENSURING THE COHERENCE OF IEC PUBLICATIONS –
HORIZONTAL FUNCTIONS, HORIZONTAL PUBLICATIONS
AND THEIR APPLICATION**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

This third edition of IEC Guide 108 has been prepared, in accordance with ISO/IEC Directives, Part 1, Annex A, by the Standardization Management Board.

This third edition cancels and replaces the second edition published in 2006.

The main changes with respect to the previous edition are as follows:

- 1) adoption of common terminology for use in the aspect-specific Guides;
- 2) addition of the task of the Advisory Committee in charge of supporting a horizontal publication;
- 3) addition of categories, types and aspects of horizontal publications;
- 4) addition of responsibilities for the different Advisory Committees and technical committees.

The text of this IEC Guide is based on the following documents:

Four month's vote	Report on voting
SMBNC/1/DV	SMBNC/2/RV

Full information on the voting for the approval of this Guide can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

In this document, the following print types or formats are used:

- requirements and normative annexes: in roman type;
- notes/explanatory matter: in smaller roman type;
- terms that are defined in Clause 3: **bold**.

A bilingual version of this publication may be issued at a later date.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

INTRODUCTION

This Guide defines rules for dealing with **horizontal functions** and **horizontal publications**. This Guide is to be used in conjunction with the ISO/IEC Directives and with the **aspect-specific** Guides.

The fundamental concept of a **horizontal publication** is that it is an international publication (not a TS or a PAS) that is widely applicable and to be used by all relevant committees and that has undergone an enhanced approval process as described in this document.

In this Guide:

- the term "committees" includes technical committees, project committees, subcommittees and systems committees.
- the term "publication" includes International Standard, Technical Report, Technical Specification, Publicly Available Specification and Guide.
- the term "product" is used to refer to individual products, processes, services and combinations thereof, commonly known as "systems".

GUIDELINES FOR ENSURING THE COHERENCE OF IEC PUBLICATIONS – HORIZONTAL FUNCTIONS, HORIZONTAL PUBLICATIONS AND THEIR APPLICATION

1 Scope

This Guide defines and describes:

- the concept of **horizontal functions** and **horizontal publications**;
- the relationship between **horizontal publications** and **product publications**;
- the optional use of types and categories of **horizontal publications**;
- the procedures for the designation of **horizontal functions** to a technical committee;
- the responsibilities of a technical committee with a **horizontal function**;
- the interaction between technical committees with **horizontal functions** and **product committees**;
- the interaction between Advisory Committees and technical committees with **horizontal functions**;
- the responsibilities of Advisory Committees related to **horizontal functions** and **horizontal publications**;
- the responsibilities of **product committees** using **horizontal publications**.

Note: The IEC Standardization Management Board (SMB) has decided that Guides such as this one can have mandatory requirements which shall be followed by all IEC committees developing technical work that falls within the scope of the guide, as well as guidance which may or may not be followed. The mandatory requirements in this Guide are identified by the use of “shall”. Statements that are only for guidance are identified by using the verb “should”. (See IEC Directives Supplement Part 1, A1.1)

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
